

As the professional body representing school principals in Singapore, the Academy seeks to engage all stakeholders through conscientious outreach efforts to colleagues in education, associates from business, and friends from the community.

We believe that the intellectual and social interactions we foster will promote sharing and understanding among the various constituent groups while cultivating opportunities for the professional and personal growth of our principals.

The Academy structures its outreach engagement into three broad levels:

- Community
- Industry
- Overseas

The Academy is keen to work with partners from community, industry or overseas to explore joint funding or research on projects and initiatives that will benefit society and the next generation. If you are keen, please contact us at admin@aps.sg
