

The Academy seeks to cultivate relationships and establish close links with our industry associates. By keeping tabs on industry trends and staying attuned to employer expectations, our school leaders will gain insights to help them strategically plan and manage their schools to produce students better equipped with skills to meet industry demands. They will also learn about best practices in organisational development which could be modelled upon and applied within the schools.

We are keen to work with our industry partners to organise company visits, networking events, sponsorship opportunities or any activity that will promote mutual benefits and understanding. Some activities previously organised include:

Organisations Visited	Dates
Republic of Singapore	April 2006
Keppel F&E	29 September 2005
NTUC FairPrice Co-operative Ltd	19 May 2005
